

February 28, 2024

Dear Valued Supplier Partner,

As a world leader in Sustainability, TE recognizes that our suppliers are an extension of our business operations and thus play an important role in providing us with the information we need to meet our regulatory and customer commitments. You are currently surveyed for the REACH Candidate List (EU REACH SVHC). On **March 5, 2024**, TE will implement two additional REACH supplier surveys in Assent to capture substances under the EU REACH Regulation ((EC) 1907/2006) namely, the Authorization List (Annex XIV) and the Restriction List (Annex XVII).

The **REACH Authorisation (Annex XIV) List** contains a select number of Substances of very high concern (SVHC) that require formal authorization (once their sunset date has passed) from the European Commission before these SVHC can be used or entered into the commerce of the EU. The complete Annex XIV list can be viewed [here](#).

The **REACH Restriction (Annex XVII) List** contains substances that the European Commission has restricted within the commerce of the EU. A restriction may apply to any substance on its own, in a mixture or in an article, including those that do not require registration. The complete Annex XVII list can be viewed [here](#).

If you have questions concerning the REACH Authorisation or the REACH Restriction, please reach out to TE at [suppliercompliancesupport@te.com](mailto:suppliercompliancesupport@te.com).

Thank you for your cooperation.
