

Dear Suppliers,

TE enterprise is implementing a new business portal called “SupplyOn” globally. This portal contains all necessary transactional capabilities to manage our supply chain worldwide and will enhance the efficiency of your interactions with TE. This will be a rolling transition in which we will gradually implement the different digital solutions with our key suppliers. The deployment is underway, with our first group of suppliers live on SupplyOn portal since Oct 2024.

SupplyOn’ s applications offer us the solution to our challenges with advantages such as:

- Information stored and highly secured in a central location.
- Database accessible to all parties at all times.
- Automatic alerts and notifications.
- Standardized processes and monitoring.
- High transparency and traceability.

If you would like to initiate your SupplyOn on-boarding, please reach us at [SupplyOnOPS](#) or connect with your TE contacts.

The table below shows a cross-reference between the current Portal functionalities and the SupplyOn Replacement, and the live status.

Supplier Portal Functionality	SupplyOn Replacement	Comments
Internet Labeling(IL)	Pack2Stock	Already Live on SupplyOn
Internet Labeling(IL)	ASN	Already Live on SupplyOn
Internet Data Exchange(IDE)	Orders	Already Live on SupplyOn
Internet Data Exchange(IDE)	Delivery Forecast	Already Live on SupplyOn
Internet Data Exchange(IDE)	Delivery Call-off(JIT)	Already Live on SupplyOn
None	Capacity Management	Already Live on SupplyOn
None	Goods Receipt	Already Live on SupplyOn
E-invoicing	E-invoicing	Planned to go live in late 2025
Invoice Inquiry	E-invoicing	Planned to go live in late 2025
None	Kanban	Planned to go live in Aug 2025
VCI	VMI/VCI	Planned to go live in Oct 2025
e-PPAP	Quality-APQP	Planned to go live in late 2025
SNMS	Quality-Problem Solver	Planned to go live in late 2025
Secured Document Access	None	Continue to be used
Dynamic Lead Time	None	Continue to be used
Global Free Trade Agreement Solicitations (OCS-WEB)	None	Continue to be used

“None” in the “Supplier Portal Functionality” column indicates that the corresponding SupplyOn functionality doesn’t exist in the current portal; “None” in the “SupplyOn Replacement” column indicates that the corresponding Supplier Portal functionality will not be replaced and will continue to be used (e.g. Secured Document Access).
